## Information technology

### About Me

Hello, my name is Thammachat Mingkhwan, and my nickname is Khaen. I am 24 years old.

I have a strong passion for programming and system design, focusing on developing web applications, mobile applications, and database management. I am also interested in internet systems, server management, and IoT (Internet of Things) technologies.

My experience includes developing IoT systems and mobile applications for internal organizational use, designing automation control systems, and collaborating effectively with teams. I take pride in improving and maintaining systems to meet user requirements and solving technical challenges efficiently.

I am eager to enhance my skills, expand my work experience, and contribute to innovative and impactful projects. My dedication to system development and problem-solving drives me to deliver solutions that align with user needs.
